COMMENTS FROM THE OFFICE OF THE TOWN MANAGER

Mr. Berry with the assistance of Mr. Walker has the two walks across the Common about complete with a new "black top" surface. This adds to the appearance of the Common as well as the convenience of anyone who has to use them.

The sewer on the lower end of Paradise Street is being replaced with an eight inch concrete pipe in the place of the old six inch tile. As this is laid well over a foot lower than the old one at the Broad Street end, we are very much interested in this will eliminate a lot of the trouble that has been experienced during the past years with this section of the sewer.

Thank you.

Who's Your Printer?

Printing is an art, and a true printer may well be an artist. But a printed product is one which often is bought on the basis of price alone. And many times one unknowingly pays too high a price by giving an order to a visiting sales-man.

The experience of a printer can be of surprising value to any user of printed matter. Your general printer can supply a wide variety of services promptly and economically and should be in touch with specialists who in certain lines can do well if given a little more time.

May we suggest that it will be "good business" for you to bring your printing problems to us?

Our years of experience may well be of value to you. Just call here or telephone Bethel One Hundred.

The Oxford County Soil Conservation District plans to provide a woodlot improvement service to its cooperators in the near future. During their regular monthly meeting held July 26 at the Soil Conservation office in South Paris it was

decided to study this matter. The plan is to provide a small crew that will operate in cooperators' woodlots that have been marked for improvement by the State Forester. It is proposed that the same crew will handle the District's tree planting program under the direction of Douglas Marston, the Soil Conservation Service technician.
